

Refresh infrastructure with confidence

Complete your technology refresh with HPE Services

Moving from legacy servers to HPE ProLiant Gen11 and Gen12 is more than a hardware replacement. It's a chance to improve performance, reduce risk and reach business outcomes sooner.

With HPE Services and HPE Financial Services, you can help customers modernise faster, get more from their investment, all while generating additional revenue for your business.

HPE Services attach

Support customers from planning to production.

- Deployment and installation handled by experienced HPE specialists.
- Workloads migrated with less disruption to the business.
- Configurations optimised and kept performing as the estate changes.
- More working life from every server, protecting the investment made.
